

AURORA

memo

Date 12-16-10

To Whom it may concern

From Marty Woolard

Location Aurora N.C.

Subject Letter of recommendation

I would like to recognize Joe Crews of CCTI Inc. for providing Overhead Hoist Operator training to 607 employees at our Aurora facility. The training was scheduled and conducted effectively over an eight week period of eight hour sessions to accommodate the number of students that were trained. Joe's professional manner in class room instruction maintained excellent student attention and participation. He provided a training agenda and content that was very relative to our site overhead hoist and rigging practices. The classroom training was followed with hands on hoist operation training that was very effective in allowing the students to apply best operator practices as learned in the classroom. The senior and junior employees who attended the course were very complimentary of the quality of information delivered and knowledge gained for overhead hoist inspection and operation.

I recommend that any company requiring a resource for training and inspection specific to hoisting and rigging consider CCTI Inc. to provide the service to meet and maintain compliance to OSHA/ANSI standards.
