

HYBRID WORK STATION CRANE

Ultimate Flexibility

Support Centers up to 50'

With extended support centers there's fewer floor obstructions which means an easier installation and more flexibility in the location of your install.

High Overall Capacity with Multiple Bridges

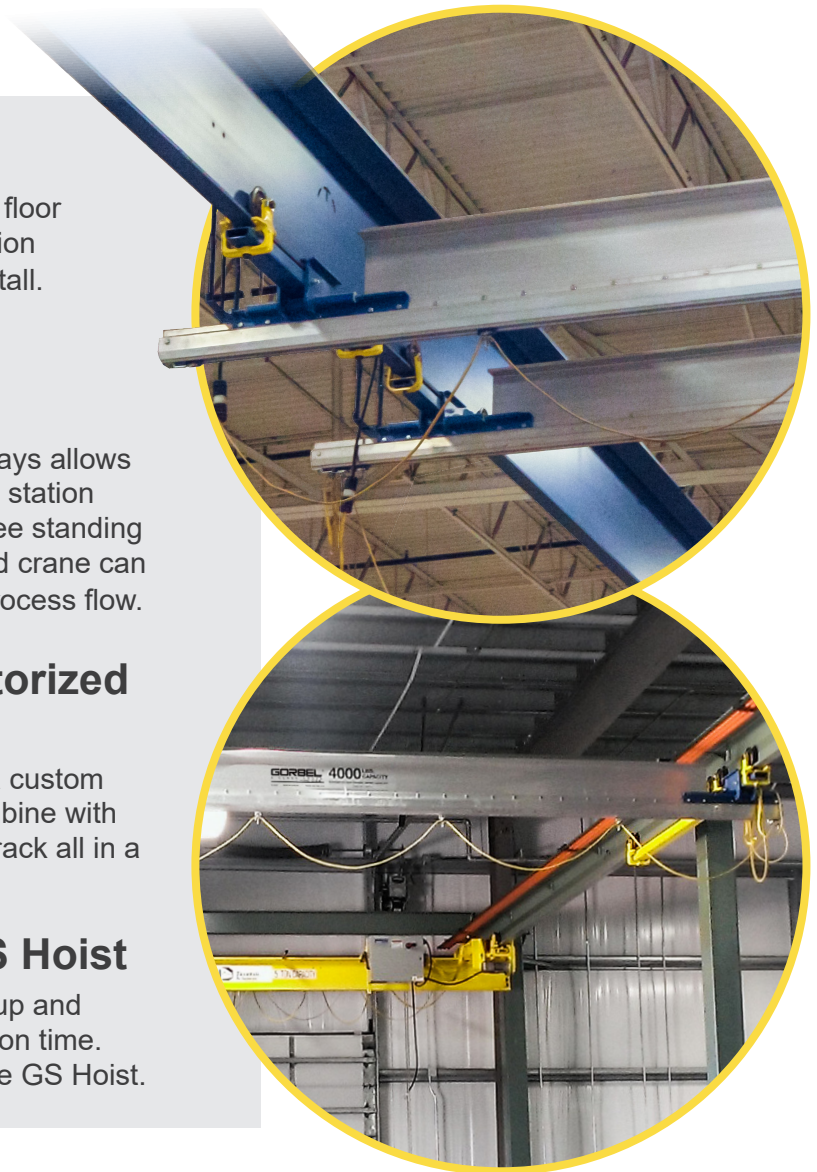

Utilizing Gorbel®'s Tarca® supports and runways allows you to support multiple 1000# to 4000# work station crane bridges, without buffers, on a single free standing or ceiling mounted crane system. One Hybrid crane can support multiple work stations or an entire process flow.

Manual or Combine with Motorized Patented Track

Optimized for easy manual movement with a custom motorized solution available as well. Or, combine with higher capacity, motorized Tarca Patented Track all in a single solution.

Compatible with Gorbel's GS Hoist

Gorbel's Hybrid Work Station Crane can be up and running with a GS Hoist with limited installation time. Out of the box, plug and play available for the GS Hoist.

	Workstation Bridge Crane		Hybrid Bridge Crane	
	Free Standing Bridge Crane	Ceiling Mounted Bridge Crane	Free Standing Hybrid Bridge Crane	Ceiling Mounted Hybrid Bridge Crane
